e2e Assured Messaging Service

Pricing Document v1.1

“The highly secure and simple to use message notification service for communicating time-sensitive information relating to security, safety, or any critical situations to your staff up to OFFICIAL-SENSITIVE.”

Pricing

e2e Assured Messaging Service

The e2e Assured Messaging Service is offered as separate service but customers are able to combine and integrate with our entire range of Cyber Security Services depending on their security and integration requirements with existing services. These have been summarised in this service descriptions and additional details and catalogue pricing can be provided in G-Cloud.

e2e Assured Messaging Service Pricing	Baseline	Enhanced	Premium

Note: The managed service costs exclude the cost of Azure Mobile services which be specified and agreed with the customer in advance. The Azure services can either be billed separately or provided by the customer.

Making the transition to cloud-based services is not without challenges and risks. Organisations must understand where they can maximise the benefits and minimise any associated impacts. Our team works closely with organisations to determine their business goals to deliver coherent cloud-adoption strategies and to identify the best use of secure cloud-based services. Our cloud-security process helps protect the transition to cloud-based services and guides organisations through each stage from initiation through to on-going transformation and evolution.
