

# e2e Discovery and Migration Support Service – Pricing Document

## PRICING

The Discovery and Migration Support Service covers support, monitoring and maintenance of the Discovery and Migration Sensor and up to 5 days professional services which can be on site if required.

Service	Service Level	On Boarding	Service Charge per Month
Discovery and Migration Sensor (1GB)	Standard	£5,500.00	£5000.00
Discovery and Migration Sensor (10GB)	Standard	£9,500.00	£5000.00

## DISCOUNTS

Additional discount of 50% if the migration is to a e2e provided IaaS service and 75% if this service is used in conjunction with the Protective Monitoring Service.

## OPTIONAL SERVICES

Additional professional services can be provided based upon the rate card and priced defined below.

**Server build** - we work with you to incorporate any custom server/VM builds required for your applications. We then use these templates to deploy onto the cloud.

**Custom Cloud design** - we work with you to incorporate any customer design element, custom components (physical or virtual) into the cloud design so that we can incorporate any customisations you wish to make. We can accommodate many different types of customer specific requests and charge on a time and materials basis.

**Ad hoc support** – we come and spend the day with you and your team assisting with any support issues or working as one of your support team to assist in a support task. This would only be needed

in exceptional circumstances but we understand that there may be critical events that requires as much de-risking as possible and having an e2e cloud support expert on site is one way to achieve this.

**Data migration services** - we assist you to move your data into or out of the service. Can also be used to connect to and migrate data to other cloud systems such as hybrid or public cloud services for the purpose of data or machine migration or configuring ongoing hybrid cloud services. For service migration e2e allows existing data to be migrated to and from the Cloud platform. Typical formats include exported VM images from VMWare or Hyper-V or VM templates of servers/server images. We support many methods of transferring data and existing services in and out of clouds.

**Advice and consultancy** – these days are typically used to support your organisation at times when you need expert cloud architects on site to support you. Examples of such events are when internal or external auditors have design/architecture questions, meetings with Accreditors/Assessors, preparing for penetration tests, preparing to roll out new applications to the cloud, cloud planning activities, presentations to the board/IT managers or any other such event that requires technical cloud architects present to support you.

Other Services		
Server build per day		<b>£800.00</b>
